# ADVANCED TRAUMA LIFE SUPPORT - 10TH Edition

## COURSE OVERVIEW

Injured patients present a wide range of complex problems. The Advanced Trauma Life Support® (ATLS®) Student Course presents a concise approach to assessing and managing multiply injured patients. The course presents doctors with knowledge and techniques that are comprehensive and easily adapted to fit their needs. The skills described in the manual represent one safe way to perform each technique, and the American College of Surgeons (ACS) recognizes that there are other acceptable approaches. However, the knowledge and skills taught in the course are easily adapted to all venues for the care of patients.

The ACS and its Committee on Trauma (COT) have developed the ATLS program for doctors. This program provides systemic and concise training for the early care of trauma patients. The ATLS program provides participants with a safe, reliable method for immediate management of the injured patient and the basic knowledge necessary to:

- Assess the patient's condition rapidly and accurately
- Resuscitate and stabilize the patient according to priority
- Determine if the patient's needs exceed a facility's capacity
- Arrange appropriately for the patient's inter-hospital transfer (who, what, when, and how)
- Assure that optimum care is provided and that the level of care does not deteriorate at any point during the evaluation, resuscitation, or transfer process

For doctors who infrequently treat trauma, the ATLS course provides an easy-to-remember method for evaluating and treating the victim of a traumatic event. For doctors who treat traumatic disease on a frequent basis, the ATLS course provides a scaffold for evaluation, treatment, education, and quality assurance. In short, ATLS is a measurable, reproducible, and comprehensive system of trauma care

## COURSE OBJECTIVES

The ATLS® course prepares participants to:

- Assess the patient's condition rapidly and accurately
- Resuscitate and stabilize the patient according to priority
- Determine if the patient's needs exceed a facility's capabilities
- Arrange appropriately for the patient's definitive care
- Ensure that optimum care is provided

## ACCREDITATION

- American College of Surgeons Committee on Trauma, USA
- International 20 CME hours by Accredited Council for Continuing Medical Education - ACCME
- The participant will be given the ATLS provider card valid for 4 years upon successful completions of all skills stations and written test.

## METHODOLOGY

- The course is composed of lectures and audiovisual presentations followed by hands-on practical station rotations.
- Testing includes written examinations and observed performance at these practical skill stations.
- The materials and presentations in these courses conform to national standards established by the American college of Surgeons.

## PRE-REQUISITES

An ATLS® manual; pre-course reading is essential to be able to participate fully in the course and pre-test.

<b>RECOMMENDED FOR</b> Surgery, Anesthesia, Critical Care and Emergency Physicians	<b>DURATION</b> 3 DAYS
---	---------------------------

**DAY 1: SKILLS STATIONS**

- Station 1: Basic/Advanced Airway Management
- Station 2: Breathing
- Station 3: Circulation
- Station 4: Disability

**7:00 AM - 6:00 PM**

**DAY 2: SKILLS STATIONS**

- Station 1: Pediatric Airway & Surgical Cricoid
- Station 2: Adjuncts
- Station 3: Secondary Survey
- Station 4: Initial Assessment Practice & Team Training

**7:30 AM - 6:00 PM**

**DAY 3: SKILLS STATIONS**

- Initial Assessment Station: Patients 1, 2, 3 & 4
- Written Exam
- Moulage Area

**7:30 AM - 1:00 PM**
